Programmer

I'm proficient in go, I write clear maintainable code. The kind of code Bill Kennedy teaches.

I'm interested in moving into Rust.

Professional Experience

Decipher Technology Studios 2017 to Present

Micro-services with gRPC https://github.com/dougfort/grpc-talk-2018
                                        https://github.com/dougfort/mystore

Studying Rust independently https://github.com/dougfort/rspider
                                           https://github.com/dougfort/rlife

SpiderOak 2007-2017

Significant contribution to an end-to-end encrypted messaging system. Focused on end-to-end encrypted messaging, message manipulation and deletion, secure file management, and more.

Contributed to the prototyping and development of an end-to-end encrypted application and cloud computing platform. The project remains unreleased in favor of the company's pivot into collaboration.
